Wyatt Speech To Kick Off Greek Week

Lt. Gov. Wilson W. Wyatt will open the University's Greek Week festivities with a speech at 7:30 p.m. Thursday, Feb. 18, in Memorial Hall.

Jerry Shaikun and Judy Pennebaker, co-chairman of the Greek Week Committee, announced that Wyatt will be asked to speak on the role the new administration will play in raising Kentucky's educational standards.

Harry King Lowman, speaker of the house, will accompany Mr. Wyatt, but will not speak.

Wyatt, now serving his first year as lieutenant governor, is well known both in Kentucky and throughout the nation.

He has served as head of the Federal Housing Administration, Adlai Stevenson's campaign manager in the presidential race in 1952, and has served as mayor of Louisville.

The outstanding greek man and woman will also be presented at the convocation that night.

Each greek organization has nominated two candidates for this honor. After the candidates have

been eliminated to 10 men and 10 women by Panhellenic and the Interfraternity Council, a faculty committee, headed by Dean M. M. White, will select the winners.

The candidates will be judged on scholarship, past and present activities, departmental honors and contributions to the greek system.

The convocation will be open to the general public and not limited to greek organization members only.

Preceding the convocation at 5:30 Thursday night, will be exchange dinners between the fraternities and sororities.

Friday night Feb. 18, Louis Armstrong will give a concert in Memorial Coliseum, which also will be open to the general public.

Saturday morning, Feb. 19, Dr. Irvin E. Langer, president of Transylvania College, will head a workshop for the campus greek organizations.

The annual Greek Week dance will be held Saturday night, Feb. 19 in the Phoenix Hotel. The outstanding greek man and woman will be crowned at this time.

Mardi Gras Candidates

The most popular University professor, who will reign as "rex", will crown one of these girls as queen of the Mardi Gras dance Saturday night. They are (first row, from left) Sue McCauley, Peggy Olmstead, Kyra Koury, Sue Blount, Cynthia Beadell. Second row—Bonnie Robison, June Moore, Trudy Webb, Cathy Rupert, and Janice Flister. Third row—Glenda Moore, Barbara Harkey, Geri Ranch, and Nancy Clay McClure. Fourth row—Virginia Leonard, Bette Pierson, Elane Woods, Jill Fiedler, and Judy Hamilton.

Architecture Class Displays Projects

An exhibition of projects of the fall semester architecture class at UK will open at 4:30 p.m. Wednesday in the Fine Arts Building.

The two major projects will be of particular interest because they offer solutions to community problems.

They are redevelopment plans for a residential block bounded by High, Mill, Maxwell, and Upper Streets, and a city park on 600 acres of Lexington Water Co. property on the Richmond Road.

The block redevelopment, to be seen in a scale model, was the senior class project.

The interior of the block was developed as a park area which would serve the residents of the block with access through private gardens at the rear of each house.

Renewal and restoration of residential areas close to the center of the cities have been notably successful in Philadelphia and in the Georgetown sector of Washington, D. C.

The UK students' plan was compiled from structures designed by the students.

Each student designed a town

house on a small lot, suitable for an older couple wishing to move into town from the country.

First, second, and third prizes, for which the Lexington Chamber of Commerce has donated \$100, will be awarded to the designers of the top three houses.

City park development plans for the Water Co. property was the junior class project. Overall site plans were drafted and each student designed a public boat house to be located on the banks of the reservoir and used as a major community recreation facility.

Each one provides a snack bar and lounge as well as storage and public rental service for small boats. Moorage also is provided for small private sailboats.

Prof. Charles P. Graves, head of the architectural curriculum at UK, instructs the senior class in architectural design. David Fogle of Georgetown, city planner for the State Planning Agency, instructs the junior design class.

The two instructors will describe the exhibits at 4:30 p.m., and architectural students will explain their designs to the visitors.

IBM Machine Not Cause Of Preclassification Woe

Students having problems in dropping and adding classes cannot blame a breakdown in the Administration Building's IBM machines.

Mr. David A. Sheets, director of the Office of Machine Statistics, said yesterday reports that late registrants were being held up by malfunctioning IBM machines were false.

One machine is torn down for repairs, Mr. Sheets said, but it was not being used to process class cards. No other machine trouble has been experienced since the Sunday before registration started, he added.

Mr. Sheets said students seeing the torn-down machine might have assumed it was the reason their permit-to-enroll cards were not immediately available.

Approximately 1,400 classes were added by students yesterday, Mr.

Sheets stated, raising the number of classes added since last Wednesday to more than 3,000. During that time the IBM Office processed at least 500 class additions a day.

Dean of Admissions and Registrar Charles F. Elton yesterday said one of the biggest mistakes made by his office in handling late registrants was in making out their fees on IBM machines.

The machines had to be set up many different times to process the many different totals being charged. IBM machines operate more efficiently when a number of cards with the same totals are run through them.

Dr. Elton said late registrants will be given fee slips filled out by hand in future registrations.

Many other problems in the dropping and adding of classes are due to causes cited previously by Dr. Elton. Many students have been handing in drop-add cards with their names omitted or class names improperly noted.

Home Economics 53 was a frequent cause of trouble as students almost universally listed it as "courtship and marriage." IBM Office workers would then have to

look up courtship and marriage in the schedule book to find out what class card to pull.

Illegible handwriting was another problem. This, coupled with improperly listed classes, forced secretaries to guess with sometimes disastrous results.

The most notable example of this was experienced when Army Cadet Col. Frank Schollett merely listed "ROTC" on his schedule card.

A clerical worker forced to guess whether Schollett wanted Air Science or Military Science, guessed wrong and Schollett ended up in the Air Force.

ID Cards

Full time students who have not received their ID cards for the second semester should report to the University Photographer's office on the second floor of the Journalism Building during office hours Friday.

At that time they may pick up their ID cards if their picture has been made previously, or have their pictures made for new ID cards.

Armstrong Concert

Tickets for the Louis Armstrong Concert, Friday, Feb. 19 will be on sale through Friday in the Student Union ticket booth from 11:30 a.m. to 1 p.m.

Voting Trend Points To Law School Rex

By MIKE FEARING

Who'll be rex of the Mardi Gras Saturday night? Who'll reign over UK's "Fat Tuesday" at the 13th annual Mardi Gras?

In three weeks the actual Mardi Gras will be celebrated in New Orleans with rex as ruler. "Fat Tuesday" or Mardi Gras is the last big fling before Lent begins at 12 midnight.

Early Tuesday morning Canal Street, the widest street in the world, becomes so choked with merry makers celebrating and awaiting the appearance of the "Krewes of Rex," or his parade, no one is able to move.

The rex of the New Orleans

Mardi Gras is usually a prominent business man of the city chosen by his "Krewes."

UK's rex is the most popular instructor on campus, and his prominence is determined by the students.

Who will he be? For the last two days the students have been filling the ballot box with their selections. It will be announced Friday. In the meantime there has been many speculations as to his identity.

Since 1949 and the second Newman Club sponsored Mardi Gras, 12 rexes have reigned, seven of which are still on campus.

Looking back over a period of 13 years a fate pattern is revealed which allows a prediction of not exactly who the rex of the 1960 Mardi Gras will be, but a prediction that can pin down his station and perhaps his department.

A flash back over a period of 12 years shows a pattern that a betting man might place odds on.

First, the students have selected, down through the years, men who hold Ph.D.'s. It can then be wagered that this year's rex will hold a doctorate.

Second, a look over the past Kernels reveals two rexes were chosen from the History Department,

two from the College of Commerce, two from the English Department, two from the Geography Department, and one each from the Law School, Physical Education Department, and the Hygiene Department.

Since the facts show that the four departments out of eight have repeated themselves and speculating on the law of "lady luck," it is predicted that the rex will come from the Law School, Physical Education Department, or the Hygiene Department.

Narrowing the field down and sticking the neck out, the Law School will most likely be the school representing the rex. Why?

Because the Law School seems to be the most organized group on campus.

This year's Mardi Gras will honor the past kings who are still on campus. They are Dr. Rhea Taylor of the History Department, who is the only professor to be selected rex twice; Dr. Robson D. McIntyre and Dr. Virgil Christian Jr., both of the College of Commerce.

Dr. Ben H. Black of the Department of English, Dr. W. Brooks Hamilton of the Hygiene Department, Dr. Charles Hockensmith of the Physical Education Department, and Dr. Roy Morlan of the Law College.

Adolph Who?

Here is proof that some people do study during basketball games. This picture was taken during the Kentucky-Mississippi State game Monday night. Wonder if there are any transistor radios concealed under the tables?

Gene Harris Receives \$50 Award

Gene Harris, a Simpson County sophomore, has been named the recipient of the Gamma Sigma Delta scholarship award at UK.

The University chapter of the honor society of agriculture makes the \$50 award annually to a sophomore in the College of Agriculture on the basis of leadership and scholastic standing.

Harris, son of Mr. and Mrs. Waller Harris, Route 2, Franklin, has compiled a 3.4 standing in three semesters at UK.

Majoring in animal husbandry, he is a member of the Alpha Gamma Rho fraternity, Block and Bridle, and has served as vice president of the 4-H Club and president of the Southern Kentucky Duroc Association.

The award was made by Dr. George B. Byers, associate professor of agricultural economics and president of Gamma Sigma Delta, and Dr. Don R. Jacobson, associate professor of dairying and treasurer of the society.

UK Kentucky Engineer Now Being Distributed

The first publication of the Kentucky Engineer for 1960 was issued yesterday.

The 65-page magazine, published by the students and faculty of the College of Engineering four times each year, is the official publication of the Kentucky Society of Professional Engineers.

Featured is an article by UK Prof. E. B. Penrod, "A Theoretical Analysis of A Peltier Refrigerator," which will be presented soon to the A.S.M.E., professional engineering society.

High School Seniors Offered Second Test

Kentucky's college-bound high school seniors will have a second chance to participate in the American College Testing program Feb. 27.

Registrar Charles F. Elton, coordinator of the program in the state, said the second test date was arranged for students who were unable to take the first test last fall.

Results of the four-hour test will be used for college admission purposes, counseling, and guidance for the students.

The test covers English, mathematics, social studies, and natural sciences. Students can arrange to take it at one of the following sites through their school principals:

UK and its three centers at Fort Knox, Covington, and Ashland; Paducah Junior College; Mayfield High School; and these colleges and junior colleges:

Bellarmine, Berea, Campbellsville, Eastern Kentucky, Georgetown, Morehead, Lindsey Wilson, Ursuline, Villa Madonna, and Western Kentucky.

Students' test scores will be sent to the colleges they wish to enter.

Other features are stories on nuclear power for marine propulsion, new engineering staff members, latest methods of FM broadcasting, and labs for sedimentation research.

Dan Holtzclaw, editor-in-chief, said approximately 3,500 copies will be distributed to UK engineering students and alums.

UK Testing Service Helps Students Select Vocation

By HERB STEELY

The University Testing Service plays a major role in helping students select a vocation.

Not only does the Testing Service give entrance tests to incoming freshmen, it also furnishes vocational guidance. This guidance is given in the form of tests which help evaluate the student's interest in certain subjects.

Many students experiencing either scholastic or emotional problems first visit the Counseling Service. It in turn refers them to the Testing Service for at least one or more, possibly several tests.

Donald L. Hartford, assistant director of the Testing Service, explained that the tests never prove exactly what the student's abilities are. They simply indicate his abilities, he said.

The tests given by the Testing Service fall into three general categories. They are aptitude, achievement and personality, and interest.

Hartford said that all the tests

are standardized and evaluated before publication.

The publisher furnishes the Testing Service with tables which help to classify the student in comparison with a larger group of students, and also gives the necessary directions for administering the test.

The test scores for UK students are evaluated under the Southern University norms, Hartford said.

Incoming freshmen are probably familiar with the College Qualification Tests, which are the entrance tests given during the first week of school.

The Kentucky Classification Battery tests, developed at UK were previously used as entrance tests.

In addition to the tests already mentioned the Testing Service gives a Graduate Record examination which is required of every student before entering Graduate School.

A National Teacher examination is given to candidates for master's degrees in education and for doctoral study.

In 1958-59 the Testing Service gave 2,740 College Qualification tests to incoming freshmen, 1,500 tests were given to students referred by the Counseling Service for evaluation, 1,700 guidance tests for departments in the University, plus 993 tests to scholarship applicants.

With so many tests to grade, Hartford said it was necessary to have a high speed grading machine which could accurately score a large number of tests in a few hours.

He added that the University machine scored 400 to 600 tests an hour.

In addition to testing and research the Testing Service receives a large number of letters from school people throughout the state concerning tests and testing services, Hartford stated.

Dr. Ernest McDaniel, director of the testing service, said one of the most important functions of the Testing Service last year was sending 3,194 letters of commendation encouraging high school students to continue their education.

He estimated that 56 percent of these students are now attending Kentucky schools, while 20 percent are enrolled in out-of-state schools.

Basham, Home Ec Major, Is Presented \$300 Award

Wilma Jean Basham, a senior who has made all A's except for two B's in physical education courses, has received a Borden Home Economics Scholarship Award.

The \$300 award was presented to Miss Basham by Dr. Abby Murratt, director of the School of Home Economics, at the Home Economics Club dinner Monday night.

Miss Basham, a vocational home economics major from Harned, is the seventh recipient of the award at UK.

It is given annually to the Home Economics senior who has achieved

the highest overall standing in the Home Economics School preceding her senior year.

A graduate of Breckinridge County High School, Miss Basham is a member of the Home Economics Club and president of Phi Upsilon Omicron, home economics honorary society.

As for her career plans, Miss Basham said, "If I don't go graduate work at once, I plan to teach home economics in high school. After getting a master's degree, I would like to teach in a college."

University Press Planning Four New Books

By BOB ORNDORFF

The University Press is planning four new books for spring.

The books' subjects will cover the geography of Nepal, a history of the Ashland Oil Co., the movements to annex the United States and Canada, and music of Baroque Masses transposed for modern organ usage.

"Nepal: A Physical and Cultural Geography," was written by Dr. Pradyumna P. Karen, geography professor at UK. Indian born, Dr. Karen traveled extensively over Nepal obtaining data and photographs for his book the first published geography of Nepal.

Over 100 of these pictures and maps compiled by Karen will appear in the publication.

After figuring, Dr. Karen said

SuKy Elects 29 Members

SuKy elected 29 new members in Monday's meeting, according to Publicity Chairman Tom Harrington.

The new members are: Molly Ryland, Jackie Arwin, Shirley Harrington, Joyce Wilson, Suzanne Head, Gae Good, Susan Fields, Diane Edwards, Carlene Lechner, Reid Bishop, Jim Carliss, Lualice Hardin, Dotty Martin, Glenda Mowe.

Neil Jo Hensley, Jerry Cornelius, Irma Strache, Tom Wilson, Barbara Johnson, Joy Scruggs, Sue Ann Page, Kitty Hundley.

Susan Cheatham, Mary Ann Cheatham, Mary Ellen La Bach, Charlene Lea, Spencer Konicov, Marcey Burgess, and Joyce Cunningham.

he could have climbed Mt. Everest 20 times with the same mileage he walked in Nepal.

"The Idea of Continental Union" by Donald F. Warner covers the annexation of the U.S. and Canada movement in the period from 1849 to 1893.

This book is the 1959 winner of the Mississippi Valley Historical Association's American Studies Award given by the association, and will be followed by a similar award annually.

The University Press has a contract to publish the first five of these award winners.

"Blazer and Ashland Oil" by Joseph L. Massie, associate professor of economics at UK, is a biography of Mr. Blazer and of the Ashland Oil Co. Massie covers the fast growth of this company, which has amazed many economists and business experts.

"Five French Baroque Masses" by Dr. Almonte C. Howell contains three previously unpublished Mass

Student Appointed By Cigarette Firm

Clay C. Carroll, junior commerce major, has been appointed business representative for a full year as part of Philip Morris' work scholarship program which supports college level education.

Carroll will work on advertising and promotion projects, and will serve as liaison between the campus and the company's New York offices.

The firm also makes grants for higher education to children of its employees, and contributes to educational and research institutions

ly upon direct mail advertisement for book circulation, according to Miss Pearce.

Dr. Howell, a music professor at UK, introduces the versets with an essay.

The University Press published four works last semester, including the "Bluegrass Craftsman" and the first of ten volumes of "The Papers of Henry Clay."

Miss Elizabeth Pearce, sales and promotion manager of the University Press, explained the press' purpose as the publishing of "scholarly works which add something to various fields."

The press makes possible many informative works which otherwise would never appear in print. Commercial presses are seldom able to print such books because of the relatively small circulation and profit.

There are approximately 50 university presses in this country, all belonging to the Association of American University Presses with headquarters in New York City.

An annual convention is held to discuss policies. The association operates as a beneficial aid to the individual presses.

The Kentucky Press relies chief-

ly upon direct mail advertisement for book circulation, according to Miss Pearce.

It does advertise in some periodicals, such as the "Saturday Review," the "American Scholar," and "Publisher's Weekly." The press has two export agents, making worldwide circulation possible.

According to Miss Pearce, 5,500 books were sold by the University Press in 1958, with 400 of these going abroad. Last year was much better, Miss Pearce said, but figures for the year are unavailable at present.

The main staff of the University Press are Bruce F. Denbo, director; Kenneth W. Elliott, editor and production manager; Elizabeth Pearce, sales and promotion manager; Evalin Douglas, assistant editor; and Robert Herndon, art editor.

The press employs one fulltime and two part-time persons in the shipping and invoicing department. The Kernel press prints the books, which are sent to a firm in Cincinnati for binding.

Kenneth Elliott said an average of one year elapses between the

receiving of a manuscript and the publishing of the book.

Approximately three months of this time is spent in the editing. The author takes about three additional months for revisions and the final six months are required for the actual printing and binding.

Astronomical Meet

Amateur astronomers will hear "Astronomy Through a Pinhole" at 8 p.m. tonight in Room 11 of McVey Hall.

Dr. Richard Hanau, associate professor of physics will address the Blue Grass Astronomical Society.

It is open to the public and especially school children, according to Mrs. Joseph C. Hayden, club president.

Repulsive Compulsion

A move to abolish compulsory ROTC, initiated in colleges and universities throughout the nation, has reached its peak in the current wave of pacifism in the larger midwestern universities. Decisions on whether to terminate compulsory ROTC in favor of the voluntary basis will be reached soon at Michigan State, Ohio State, Wisconsin, and the University of California, the largest university in the nation with 40,000 students.

Under the 1862 law setting up the land-grant college system, all land-grant schools were required to offer courses in military training. However, the participating schools are now at liberty to set up their own ROTC program on either a compulsory or voluntary basis. As a tradition, land-grant schools have set up their military training programs mandatorily.

At present three land-grant schools offer voluntary ROTC—Massachusetts Institute of Technology, Minnesota, and Utah State—out of 68 land-grant institutions. Top military men, especially those in the Army, are worried that the abolition of compulsory ROTC in some schools may ignite a widespread repugnance against compulsory ROTC in the larger land-grant colleges.

The Army is caught in bind between the Pentagon and the Navy and Air Force. In the next 10 years

the Army hopes to acquire 11,000 officers through the ROTC program. It depends heavily on this source for officer manpower, whereas the Navy and Air Force expect only 4,000 and 3,000 respectively, from ROTC programs.

If ROTC is placed on a voluntary basis, then will there be an adequate number of commissioned graduates to meet the defense officer manpower demands? That question is disturbing many top military officials. A Michigan State official estimates ROTC enrollment would thus drop 20 percent. And, MIT, which inaugurated voluntary officer training in its 1958 fall term, reported enrollment dropped off to about one-third of the present level.

But even with the decrease, it is logical that students taking ROTC on their own initiative probably have strong inclinations toward advanced training. This being the case, they will undergo better training with more attention, smaller classes, and more interest. The wasted expense and effort on those forced to enroll would be erased.

The case against compulsory ROTC also is strengthened by moral reasons. It is difficult for a student to have his heart in a subject which neither provides him representative military training nor a credit on his military record. The current attitude toward basic ROTC at the University is that it is to be tolerated, much like one would tolerate an offensive person because of his ignorance. Required ROTC merely serves to taint the organization with indifference and with silent insubordination.

We would not go so far as to call basic ROTC a "farce," as many UK students tend to do. The connotation that the word "farce" has toward the humorous vein would eliminate us, because compulsory ROTC is by no means something to be passed off gaily.

It would not discredit the University if it were to evaluate its ROTC program, much in the same manner that the midwestern universities have done. It should not distress the UK ROTC unit to submit itself to objective scrutiny, nor should it shrink in trepidation from a critical analysis.

The mere fact the ROTC exists to mass-produce officers does not give it the sanction of infallibility and the blessing of the defense-minded public. Compulsory ROTC, however, does provide the iron hand of "must" to college students who more often are interested in other things besides keeping in step to discordant cadences. The element of choice must be offered or else the armed forces should allow basic ROTC to count on a student's military record.

KERNELS

"One of the benefits of a college education is to show the boy its little avail."—RALPH WALDO EMERSON

"The highest possible stage in moral culture is when we recognize that we ought to control our thoughts."—CHARLES DARWIN.

"You can tell the ideals of a nation by its advertisements."—NORMAN DOUGLAS.

Drama On The Newsstands

By ISOSCELES GOODFELLOW

The March issue of "True Female Experiences, The Magazine For Females" is off the presses now. This review is designed to reveal what stimulating literature the mothers of our nation read in those scant moments away from the stove or vacuum cleaner.

The opening story in the magazine is titled "Cancer Saved My Marriage," as straightforward a story as has crossed this desk in many a day. Near the beginning is this quote: "Suddenly you're faced with losing the one you love, and then there comes the aching hope that it is not too late to find your love again." It is then explained how the marriage was saved by cancer. The husband's mistress died with it.

The second feature of the March issue is something every mother should read. It is called "It Took Me Four Years To Find My Kidnapped Baby." A photo caption on the first page gives this information: "They dug up the garden and tore up the basement floor, looking for my baby. He's been kidnapped. I sobbed, Kidnapped. KIDNAPPED. Unless the little idiot ran away."

On page 15 is the semiannual winner of the magazine true story contest, entitled "Husband Wanted." (Momma advertised to the whole town that I needed another man). But this woman does not really need another husband, as this quote reveals: "I couldn't help wishing that I could get closer to my son, that I could push past that small-boy armor and feel like a mother, a real mother. 'Oedipus,' I called. . . ."

The next article is introduced with a large picture of a man and woman of middle age seesawing in the park.

"Is Your Husband Fat?" says the title. (Restore your Casanova and add years to his life). Which being interpreted means don't let the old boy knock off until after he renews his insurance policy.

After two shorter articles, "My Tongue Drove My Husband Away," and "Unnatural Mother," (I was having this baby only to please my mother-in-law), the magazine includes a true story which is a genuine twist of an old theme. In "Mrs. Know-It-All," a woman for once admits there could have been some slight error in her judgment: "There I was," she says, "a hundred miles from help, out of gas, with a flat tire and no spare, a blizzard raging outside, and the howl of wolves in the distance. Then the labor pains began racking my body. I felt I was in trouble." Part II of this article will appear in the April issue.

The final article of the March issue was an inspiring piece written in first person by a 10-year-old boy, published as a dire warning to weak-first paragraph begins: "Please, Mother, Don't Drink Any More." The first paragraph begins: "Please, Mother, don't drink anymore. For the second weekend in a row, there's not been a drop in the house for me."

The next issue of "True Female Experiences," promises to be equally exciting, with its lead feature on "Educational Toys For Baby—Plastic Bags." In the same issue, the reader can look forward to "My Son is a Teenage Teenager," as well as "I Killed My Parents But They Called Off The Orphans Picnic Anyway." Buy it, and join the mothers of America, those noble women who are the foundation of our democracy, in this intellectual diversion.

A Citizen's Nightmare

Until April, 1954, Louis Pollock was a pretty successful Hollywood writer, working on movie and television scripts and publishing stories now and then. After that April, things began to go bad. Scripts came back and his only commission was occasional ghost writing. His house was mortgaged, his wife became worried, and their relations strained. He thought either that a "clique" was against him or that he had lost his gift somehow.

A couple of months ago, however, Mr. Pollock met an executive in the entertainment industry and discussed his problem. Finally, it emerged that Mr. Pollock was on the "blacklist." A little research showed him that one Louis Pollack, a clothier, had refused

to answer questions before the House Committee on Un-American Activities in April, 1954. A lawyer was engaged and wrote to the local representative of the committee. The committee confirmed that Louis Pollock and Louis Pollack were two different men.

Presumably Mr. Pollock, the writer, will soon be on his feet again, now that the confusion has been cleared up and publicized. But it is impossible not to agree with his statement, "I can't help thinking that in those five long years nobody ever asked me once: Are you this man? Could you be this man? Nobody ever asked me." Secret condemnation, without trial and without published verdict, is alien to the American tradition. —The Baltimore Sun.

PAGING the ARTS

Tour-Made Movies
Need Photo Techniques

By The Associated Press

Taking scenic photographs on tour in Europe can be tough, whether movies or stills.

The two worst faults in doing such movies often are wild panning and under-exposure. Panning is moving the view from side to side.

"Sometimes," one amateur explains, "pan shots are necessary from sightseeing buses or autos. Of course, the cars bounced and so did my camera. The drivers didn't slow up to suit my convenience so it was a question of getting what I could or nothing at all since each tour was a one-time-only visit."

Now that he sees his results this amateur knows he shouldn't rest his elbows on the window sill of a moving vehicle.

It's a perfect conductor of vibrations. If he had kept the camera pressed against his face, his body would have absorbed much of the vehicle's movements.

He even took some "desperation" shots in inadequate light when he was on the run at air or railroad terminals or going through a museum.

In one or two cases, his gamble paid off thanks to a fortunate arrangement of fluorescent lighting or daylight streaming in from a nearby window.

Another good idea is to shoot at a faster film speed. When movies are shot at 24, 32 or 48 frames a second, the final effect on projection is to level out the jerky movements.

Of course, the lens aperture must be opened wider to compensate:

UPROOTED PILLBOX in Neuwied, Germany, makes good photo subject for lens lad on tour.

one full stop, for instance, if shot at 32 frames per second instead of the normal 16 frames.

It is better to have a light meter and to slow to eight frames per second in dim lighting.

The latter idea worked out especially well in taking neon-lit night scenes of cities. The slower speed doubled the exposure making it just right for wide-open shooting.

In viewing, the film is projected at double the taking speed which usually turns out to be even more effective in the shots of flashing lights.

Socialism Beckons One,
Forewarns Another

By WAYNE SMITH

"What more challenging crusade could we all join than an expedition to gain a socialistic America!"

These words are an exclamation from the preface of a symposium of essays by contemporary American socialist entitled "Toward A Socialistic America," edited by Miss Helen Alfred (Peace Publications, 223 pages, \$1.50).

Under a socialistic government, all means of production, distribution, and exchange are under common ownership or other measures of governmental control which bring a so-called distribution of income. And, the government would equalize income and opportunity, as by graduated taxation, compulsory insurance, and by state administration of industries, public utilities, common carriers and the like.

The Marxian socialist believes that capitalism and profit should be abolished, and that this can be accomplished only through the attainment of political power by the proletariat.

Equalization of income and opportunity would, in my estimation, tend to deter any incentive for advancement in the professions.

In "Toward A Socialistic America" Miss Alfred advocates the system of "replacing this wasteful and unstable capitalistic form

of government and production with one founded on the social ownership, planning, and management of production and distribution.

Miss Alfred continues "it can never be forgotten that the socialist movement is international in spirit and in the scope of its goals." This too, is evident to me as I watch Communism, which is basically socialistic government, envelop the world."

Recognized as one of the major advocates of American socialism, Miss Alfred was born in Lake Geneva in 1889. She was a Socialist Party candidate for the New Jersey State Legislature from Essex County in 1930, but her views on socialism were not accepted by the people of New Jersey.

For the persons who want to know more about this threat to our way of life, this review is done as a public service.

Book Covers 'Washington
Crossing The Delaware'

By AL ROYSTER

Not the legends but the true facts that led up to Emanuel Leutze's painting, "Washington Crossing the Delaware," are the basis for "Portrait of Patriotism," a late '59 book.

The author is a former winner of the D.A.R. Award of Merit, and as a patriot is well known to thousands of persons all over the United States.

She vividly describes Leutze's struggle during his early years, his education in Germany, his successes in Dusseldorf, Munich, Rome, and Venice, and his youth in Philadelphia, as well as the story of the great patriotic painting.

Leutze's story is as stirring as his famous painting, even though his biography almost repeats the cliché—small European boy comes to America, boy grows up, man makes good.

Throughout all, Leutze remained a dreamer, and was constantly seeking to find out "why?"

Why had not someone painted: "The Signing of the Declaration of the Independence"?

Why had not Washington's crossing the Delaware been painted?

We see Leutze as a boy first making sketches of his pet dog, then going on to other more difficult subjects.

Now Leutze, as a man, retraces Washington's steps — seemingly never wanting to stop acquiring information about the famous general.

Finally Leutze's play-by-play written description of Washington crossing the Delaware, and in his own words telling how he painted the famous event.

We should congratulate the author, Mrs. Ann Hawkes Hutton, for her outstanding book, "Portrait of Patriotism." It is priced at \$2.75, and is published by the Chilton Co.

In Europe there is only one telephone for every 15 inhabitants.

'Admiral Thunderbolt'

By GERALD RINGO

For both the teenager relishing exciting adventure, and the adult looking for "live" biography, "Admiral Thunderbolt," by Hans Christian Adamson (Chilton, 336 pages, \$5.95) will provide more than a glimpse.

"Red sky in the morning, sailor take warning." This message of caution was not heeded by Peter Wessel, Norwegian naval hero, and it should have been obeyed.

A narrative biography of Wessel is another link in the Adamson chain of naval history and life. This is not, as some of his books have been, a definitive history.

It is a vivid portrayal of life on the seas and concludes with nautical notes on the 1710's that captivate the adult or young mind interested in nautical experiences.

Adamson's books include, "Keeper of the Lights," a biography of Eddie Rickenbacker; "Hellicats of the Sea" and "Through Hell and Deep Water."

Colonel Adamson was Chief of

Office during World War II and has adequate command of the the USAAF Personnel Narrative knowledge and language necessary to portray life on the seas.

Spence Says

By
Newton Spencer

Ever notice the similarity between the careers of Vernon Hatton and Billy Ray Lickert?

Both played their high school ball at Lafayette High School. They both led their teams to the state championship and made all-State. Ralph Carlisle, Lafayette coach, said concerning them that they were two of the best that he had ever coached.

After high school, both cast their lot with the University of Kentucky where they became standouts in their sophomore year.

The two were bound for All-American in their junior year, but something happened. Hatton missed part of his junior season after an appendicitis attack and Lickert had an operation on his thigh, which kept him out of five games. Hatton, in his senior year, made All-American and led UK to the national championship and later entered pro ball. Can Lickert do it?

Making All-American shouldn't be too hard for him next year, but the national championship is another thing. However, next year's team should be more talented than the "Fiddling Five."

As for pro ball, Lickert should find it a lot easier than Hatton because of his greater size and speed.

The public address announcer at UK's basketball games provides many services for the fans. He announces scores, goals, fouls, and finds lost owners of boys, belts, and scarfs.

With all these services, it looks like he could have informed the fans of the status of Bennie Coffman Saturday night.

With Coffman not dressed and

all the rumors flying, one would assume that he was ineligible, but for how long and why?

Just a statement would have cleared up the situation.

Notre Dame, which comes to town Saturday, will be only the second team that Kentucky has played this season that has a series edge over the Cats. North Carolina was the other.

However, UK is closing the gap against the South Bend crew. Kentucky has won the last four games and the Irish beat Kentucky last in 1950.

Last year at Chicago, the Wildcats had an easy time with Notre Dame as they won 71-52. Lickert and Parsons starred for the Cats.

Lickert scored 24 points and held Irish star Tom Hawkins to 13. Parsons scored 17 in the win.

YOGI HAD AN ANSWER

Rice Leads Kittens Over Transy

Playing the last minute with only four players, the UK Freshmen beat the Transylvania Junior varsity, 73-63, Monday night.

The Kitten squad, cut to only eight men by eligibility troubles, ended up one short when four players fouled out. Using a zone defense and playing for only the good shot, the frosh held on for the win.

The UK freshmen had to come from behind to win. Trailing, 27-23, at halftime and most of the second half, they finally tied the score 61-all on a jump shot by

Scotty Baesler with six minutes left.

Bob Rice then hit a turn-around shot; Pieratt a jumper and Rice came back with a tip in 'o wrap up the victory.

Rice led the Kittens with 19 points. Next were Baesler with 16 and Bernie Butts with 12.

Charles Moore, Transy center, was the leading scorer in the game with 27. Paul Hughes, brother of

UK sports star Lowell Hughes, scored 19 before fouling out with 6:48 to go.

Others scoring for the Kittens were Dick Conley 11, Bill Pieratt 8, Mark Crain 5, and George Atkins 2. Nickle Dunn played but failed to score.

The UK yearlings hit 25 of 78 field goal attempts for 32.1 percent while Transy hit 23 of 53 for a percentage of 43.4.

Cats Bury Maroons 90-59

Between interludes of what seemed like organ funeral music—in contrast to the UK band—Kentucky buried Mississippi State 90-59 before 10,600 Monday night.

The Cats wrapped up the game early after the Maroons had taken an early lead. Playing probably their best ball of the season, they poured it on the Maroons in the second half.

Don Mills, playing one of his better games, was the high scorer for the game with 22. He scored his points on eight field goals and six free throws.

Next for Kentucky was Ned Jennings with 17 and Sid Cohen with 16. Dickie Parsons with 10 was the only other Cat in double figures.

Jim McDonald, playing his usual consistent game, had nine.

Charles Hull and Jack Berkshire led the Maroons with 13 each. Most of Berkshire's points came in the second half.

Kentucky outrebounded their opponents 55-33. Mills had 17 and Jennings nine to lead Kentucky. The leading rebounders for Mississippi were Graves with 8, Hull with 7, and David Glasgow pulled down 6.

Kentucky shot well from the floor. It hit 34 of 80 shots for a percentage of 42.5. The Maroons didn't fare so well, hitting 21 of 57 for 36.8 percent.

Although UK's offense was sharp, the defense was even better. This was especially true in the first half. Because the Maroons hurried their shots, many of these shots never reached the bas-

ket. State shot a measley 26.9 in that half.

The Mississippians started out as if they were going to make a game of it, but that threat didn't last long.

After Hull opened the game with a jump shot, Cohen and Parsons evened the count with free throws. Graves hit a one-binder to restore the lead to State for the last time.

Parsons hit a set shot after a free throw by Cohen and Kentucky had a 5-4 lead. Jennings hit a jump shot, but Hull retaliated to pull Mississippi State back within one point.

Kentucky then outscored their opponents 8-1 over the next two minutes to pull away.

During this spurt, Cohen and Parsons each hit field goals, MacDonald had a field goal and a free throw, and Mills threw in a free toss.

The Cat's longest lead of the half was 43-18 with 1:10 remaining.

The leading scorers in the first half were Cohen with 12 and Jennings with 10. McDonald, Mills, and Parsons each had 7.

For Mississippi State during the opening half, Graves had 7, Hull 6, and David Glasgow 5.

Billy Lickert, who had missed the previous five games because of a thigh operation, played briefly during the half but failed to score. He returned to play seven minutes of the second half and scored five points.

If the Maroons had any intentions of staging a comeback, two quick baskets by Cohen and Mills at the start of the second half, quelled their hopes.

This gave Coach Adolph Rupp a chance to give some of his players a little experience. Every squad member saw action except Al Robinson, Roy Roberts, and Eddie Mason.

Bennie Coffman, who had been ruled eligible only a few hours before gametime, entered the game midway the second half and scored two points.

Usually a sure shot, Coffman seemed to be pressing and missed a few he usually hits.

While Kentucky was winning impressively, Georgia Tech took another step toward the SEC championship by whipping LSU at Atlanta.

Two teams still must defeat the Engineers if Kentucky is to represent the conference in the NCAA tournament.

Nobody Hurt

David Glasgow, Mississippi State forward, and Dickie Parsons, UK guard, entangle under UK's basket after a lay-up attempt by Parsons. Parsons was fouled on the play. The Cats won easily over the Maroons, 90-59.

Meanwhile, Kentucky must win the remainder of their conference games. Teams left on the schedule are Vanderbilt, Auburn, Alabama, and Tennessee.

The remainder of Tech's games are on the road. They must face Tennessee, Georgia, Florida, and Vanderbilt in that order. Tennessee

and Vanderbilt are the two teams given a chance to beat the Engineers. In their next encounter, Kentucky steps outside the conference to face Notre Dame Saturday at the Coliseum.

Mississippi State next plays Georgia Saturday at home.

IBM WILL INTERVIEW FEB. 24 & MAR. 15

IBM invites candidates for Bachelor's or Master's Degrees to discuss opportunities in Product Development on February 24 and Marketing on March 15.positions throughout the United States.

Laboratories and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie, Yorktown, N. Y.; Burlington, Vt.; San Jose, Calif.; Lexington, Ky.; and Rochester, Minn. Corporate headquarters is located in New York, with 192 branch offices in cities throughout the United States. The IBM representative will be glad to discuss with you the type of career of particular interest to you. IBM offers:

- Leadership in the development of information-handling systems.
- New applications for data processing and advances in computer technology.
- Favorable climate for continued career growth.
- Opportunities for a wide range of academic backgrounds and talents.

Contact your College Placement Officer to arrange an appointment for a personal interview with the IBM representative.

If you cannot attend the interview, call or write:

BILLY LICKERT

Returns to action after missing five games

Top Officials Wanted

By The Associated Press

George Smith, coach of the University of Cincinnati's basketball team, dislikes the way the Missouri Valley Conference assigns officials.

"The coaches from the various schools rate the officials," he says, "but they are not assigned to the important games in keeping with that rating."

"While not taking anything away from any of the officials, for they all are sincere, I still say that in games between teams in the running for the championship, the best officials should be working."

Smith, whose team headed by Oscar Robertson, has won the Missouri Valley Conference title the last two years, believes that basketball is the most emotionable game in sports.

And, because of that, he says, a home crowd has influence on calls made by officials, in spite of themselves. However, he adds that it eventually turns out about even, since each club plays a contender twice, once at home and once away.

Graduating Seniors

Seniors in the College of Arts and Sciences who plan to graduate in June should apply in Dean M. M. White's office no later than Feb. 16.

WESTERVILLE, Ohio (AP) — Sign on used car lot: Prices Are Born Here, But Raised Elsewhere.

New Apparatus

Prof. Edwin Bennett views apparatus which will be used for the first time this semester in a graduate course in sanitary engineering.

Educational Documentary To Be Given By WBKY

"Everybody's Mountain," a nationally acclaimed documentary about the American educational system, will be included in WBKY's spring program schedule.

This new National Association of Educational Broadcasters' series will consist of 13 programs, 12 half-hour programs and one hour program. The programs will be aired at 7 p.m. each Wednesday.

The series reports on "mountain-tops" of educational leadership and imagination in the U.S. today.

The broadcasts are designed to offer the general listener fresh, entertaining, and significant insights into American education in the 20th Century—into its needs and opportunities.

The narrator describes himself as "a citizen-taxpayer on a mission behind the blackboard curtain of contemporary American education."

Also offered this semester at 7 p.m. Thursdays will be documentary series, *Anatomy of Soviet Communism*, a series of eight half-hour programs.

This series was conceived as a primer on the Communist experiment reporting on the promises the Bolsheviks made to the peo-

ple and the extent to which they have fulfilled their pledges.

WBKY has begun broadcasting special music for students enrolled in music Humanities E courses. These programs may be heard Monday through Friday from 4-5 p.m. CDT or Sunday and Monday at 7 p.m. CDT.

The station began broadcasting special music for this course in the fall of 1958.

This program is to aid Humanities E students in obtaining the necessary outside class listening required for the course.

Freeman Elected To Dairy Post

Dr. T. R. Freeman, UK professor of dairying, has been elected president of the dairy section of the Association of Southern Agriculture Workers.

He was named to the post last week at the group's convention in Birmingham, Ala. He served as vice president of the section in 1959 and as secretary in 1958.

Some 12 UK faculty members attended the convention.

Frank Schollett Selected To Command ROTC Drill

Frank Schollett, UK senior from Brea, Calif. has been named to command the Army ROTC drill brigade for the current semester.

With the cadet rank of colonel, Schollett will be in charge of the entire drill program for all cadets in Army ROTC.

Schollett was named the most outstanding of 1,000 cadets at a six weeks summer training camp at Ft. Knox last summer.

In addition, he has been a member of the Wildcat football team the past three years.

Serving under Schollett as members of the brigade staff are Donald Neel, cadet lt. colonel; Jeff

Brother, cadet lt. colonel; Dulaney O'Roark II, lt. colonel; Chappell Wilson, lt. colonel; Daniel Holtzclaw, major; David Hume, major.

Harold Hodor, major; William E. Dunning, major; William L. Quisenberry, major; Charles Cassis, captain; and Gurney Norman, captain.

Company commanders, all with the rank of cadet major, include Donald McKenzie, Gerald Elsmann, Robert White, Kenneth Hixon, and Gerald Silvers.

Fitzgerald Heads Minnesota Clinic

Mr. Bernard Fitzgerald, head of the Music Department, has been invited to be guest director of the Minnesota all-state high school band clinic.

Mr. Fitzgerald will head the group this week at the University of Minnesota in Duluth.

Perkins To Head UK Mining Society

J. Robert Perkins, metallurgical engineering senior, has been elected president of the Norwood Mining Society, professional engineering society.

Other officers for the spring term include Jack Howard, Tompkinsville, vice president; Jim Steedly, Louisville, secretary; Jim Gray, Jenkins, treasurer; John Jenkins, Madisonville, sergeant-at-arms; and Charlie Dixon, Sanford, N. C., engineering council representative.

The Norwood Society, named for Prof. J. Norwood, early Mining and Metallurgical Department head, is the student chapter of the American Institute of Mining, Metallurgical and Petroleum Engineers.

'Picnic'

The movie, "Picnic," starring Kim Novak, William Holden, and Rosalind Russell will be presented in the SUB Ballroom tomorrow at 6:15 p.m.

Do You Think for Yourself?

(DIAL IN THESE QUESTIONS AND SEE IF YOU'RE IN FOCUS*)

If you saw a full-rigged sailing ship in the middle of the desert, would you say (A) "Long time no sea!" (B) "Wish they'd invent talking mirages," or (C) "Anything can happen in Las Vegas!"

A ☐ B ☐ C ☐

When a man says, "Brevity is the soul of wit," he means (A) he's about to make a long speech; (B) wise thoughts come in short sentences; (C) "Shut up!"

A ☐ B ☐ C ☐

You're caught in a pouring rain—and you're offered a lift by a pal whose driving is dangerously erratic. Would you (A) tell him you enjoy walking in the rain? (B) say, "Sure—but let me drive"? (C) accept rather than hurt his feelings?

A ☐ B ☐ C ☐

In choosing a filter cigarette, would you pick one that (A) says the filter doesn't count, only the tobacco; (B) is designed to do the best filtering job for the best taste; (C) gives you an enormous filter but very little taste.

A ☐ B ☐ C ☐

When you think for yourself . . . you depend on judgment, not chance, in your choice of cigarettes. That is why men and women who think for themselves usually

smoke Viceroy. They know only Viceroy has a thinking man's filter—the most advanced filter design of them all. And only Viceroy has a smoking man's taste . . . the full rich taste of choice tobacco.

*If you have checked (C) in three out of four questions, you're pretty sharp . . . but if you picked (B), you think for yourself!

The Man Who Thinks for Himself Knows — ONLY VICEROY HAS A THINKING MAN'S FILTER...A SMOKING MAN'S TASTE!
